

GEONODE LTD.

FOUNDED

in **2010**

CORE OF THE DEVELOPMENT

Seismic prospecting by autonomous self-floating bottom recorders in shelf and deep water areas.

APPLICATIONS

The Geonode Prospecting technology allows operating in the shelf areas, which were inaccessible earlier, thus obtaining quality images of target horizons, reducing drilling risks and optimizing prospecting costs.

IMPLEMENTATION

ALREADY IN **2013**.

PEOPLE

TECHNICAL DIRECTOR:

Dmitry A. Il'yinskiy,
PhD in Physics and Mathematics

MANAGING DIRECTOR:

Alexey Y. Razumov

DIRECTOR FOR MARKETING AND DEVELOPMENT:

Yevgeny V. Borisov

Development features

The technology has unique operating advantages allowing recorders to operate in shelf, transitional areas and in areas with obstacles. It is an alternative to the existing technologies for operating in deep water areas that provides better data quality with lower costs.
